**DETAILED ACTION**

***Response to Arguments***

Applicant's arguments filed 6/21/2004 have been fully considered but they are not persuasive. Applicant argues that the Examiner has not established a prima facie case of obviousness and that the references, Rehker and Viswanathan, can not be combined. The argument is not persuasive because the motivation for using a MLPS network in place of a tag switching network is provided by Viswanathan. Viswanathan specifically discloses that tag switching is an older technology than MLPS and also discloses the advantages of MLPS. Hence, reference provided the motivation to combine. Therefore the examiner has properly established a prima facie case of obviousness.

Applicant also argued that the Rehker teaches away from the present invention. Applicant argued about way the enterprise assigned assigned address within a private network is different than the present invention and the mixing of customer routes with carrier routes and IP addresses, etc. The argument is not persuasive because the argued matters are not in the claims.

Claims 1-4, 7-10, 15-22 remain rejected as stated in the prior office action.
